INFORMATION NOTICE

This year, the Hungarian Chemical Industry Association will organize its 31st conference in Eger, the MAVESZ Chemical Industry Conference. In keeping with tradition, the two-day event will feature presentations and roundtable discussions on the state of the chemical industry, changes in European and domestic legislation, best corporate practices, and current professional topics, with contributions from government, regulatory, and corporate experts.

Date of the conference: October 14–15, 2025 (Tuesday–Wednesday) Venue: Hotel Eger & Park **, Eger**

The program consists of four clearly defined thematic sections:

1. **Section One:** Presentations by MAVESZ, government representatives, and international guests on the state, challenges, and legislative efforts of the chemical industry in the European Union and Hungary.
2. **Section Two:** Focus on environmental protection, energy, and safety technology. Introduction of MAVESZ's new working group (energy efficiency), insights into regulatory tasks, and examples of good corporate practices.
3. **Day Two Continuation:** Further exploration of environmental and safety topics. Highlights include updates on REACH, CLP, noise regulation, and corporate examples of safety best practices.
4. **Final Section (Revised):** While still connected to the crucial topic of professional training and succession, this section now emphasizes industrial automation and digitalization, with a special focus on artificial intelligence, showcasing corporate practices and educational links.

We warmly invite company leaders and professionals from various fields to attend these timely, informative, and high-quality presentations.
